The Goods and Services Tax, commonly known as GST, is a comprehensive indirect tax that aims to simplify the tax structure and promote the ease of doing business in India. One of the main objectives of GST is to enable real-time tax reporting, thus reducing the scope for tax evasion and increasing transparency in the tax system. By implementing a real-time tax reporting system, GST aims to enhance compliance and efficiency, enable better tracking of transactions, and eliminate the burden of frequent tax filing. Overall, GST seeks to establish a robust tax administration framework that promotes tax compliance and fosters economic growth in India.
