RIMS Manpower Solutions (India) Private Limited is specialised in providing **Contract Staffing** services for various segments of industry and corporates in India for the last 18 years facilitating business organizations to acquire a flexible workforce for enhancing their productivity & quality while reducing employment-related risk.

Contract staffing is a process where workers are hired on a short-term basis instead of recruiting permanent employees. Market demands shift quite fast today, especially because of the popularity of flexible working. For many employers and employees, contract staffing is the preferred option.

When contract staffing is involved, there is a specified time duration that it is supposed to last. The period can be set to cover short-term projects, leave periods taken by employees, or busy season. It can be

based on part-time or full-time work. After this, the company and the contractor are not obligated to one another.
