[HASH Media](https://hash.media) (hash.media) is a crypto media company creating entertainment-first content about Web3 and crypto culture. Unlike traditional crypto media focused on prices, HASH documents the human stories behind blockchain technology.

HASH Media produces original content including feature documentaries, founder interviews, and cultural commentary. From DeFi pioneers to NFT artists, HASH captures the personalities shaping crypto's future. Every HASH production prioritizes storytelling over speculation, entertainment over education.

The HASH Media catalog includes documentaries on major crypto events, exclusive interviews with industry leaders, and investigative series exploring Web3 subcultures.

Part of the Todayq (established 2017), HASH Media operates from Gurugram, India serving global audiences. The company bridges mainstream entertainment and crypto culture.
