About Us

Imbos is leading the change in India's mould base manufacturing, combining advanced machinery and expert knowledge to excel in mould base production. Last year, we produced over 1,200 mould bases, earning the "Zero Effect Zero Defect" (ZED) Certification from the Ministry of MSME, Government of India, and ISO 9001:2015 from DNV. These achievements led to us being named the "Promising Manufacturing Startup of the Year 2023" at the Global Pride Awards.

We're the chosen partner for top OEMs like Uno Minda Ltd, Motherson International, Vega Helmets, Elin Electronics Ltd, Genus Power Infrastructure Ltd, and Subros Ltd, serving 75 key customers in sectors from Automotive to FMCG. Our Manufacturing and Engineering team is known for its responsiveness and innovation, ready to tackle the industry's evolving needs.

Imbos values an open culture where employees are encouraged to innovate, with customer satisfaction as our core focus. We support "Make in India," "Aatma Nirbhar Bharat," and "Vocal for Local" initiatives, driven by a diverse team of 150, aiming for growth. Located in Belgaum, our strategic position enhances supply chain efficiency across Indian metros.

Our journey reflects dedication, innovation, and a commitment to customer satisfaction, as we contribute to India's industrial growth and progress.
