sales.ipc@ipcvalves.com

IPC is leading manufacturer of [Gate](#), [Globe](#) & [Check](#) valves. Integral Process Controls was founded in 2001 with an objective to solve two key pain points for the customers. First, was to reduce the valve delivery time, significantly, to meet the aggressive demand timelines of the clients. Secondly, we sensed a need to meet the huge and largely unmet need for assured supply of quality valve and valve automation solutions of the customers.
