[NetSuite Functional Online Training](#) is a job specific program designed to provide the knowledge and hands-on experience needed to be a part of the Oracle NetSuite ERP team. The course includes the end-to-end functional processes, ERP implementation concepts, system configuration, and business operations. Ideal for MBA students, Cloud ERP consultants, Freshers, Financial and Accounting Professionals, and graduates aspiring to a successful career in cloud ERP. Zx Academy provides practical, hands-on training and real-life business situations in order to job ready the students in industry relevant training.

The Online training consists of all of the key functional aspects of NetSuite such as Financial Management, CRM, Order Management, Procurement, Inventory Management, Warehouse Management, Fixed Assets, Dashboards, Saved Searches, Reports, Role Based Access, Workflow and System Administration. Learners also get practical application experience and confidence through a live case study and practical assignments.

Participants can obtain a certificate of completion for the training and advice for the preparation of the NetSuite certification. Sessions are conducted by experienced corporate trainers who have extensive implementation and consulting expertise. Get Career Guidance and placement assistance for a bright future and learn NetSuite from expert with real-life ERP skills from Zx Academy today.
