[Aikya](#) is a high-tech facial recognition device for secure environments, using advanced AI. It supports various authentication methods like facial recognition, RFID, fingerprint scanning, and passwords for complete access control. With a range of up to 2.5 meters and the ability to identify multiple people at once, Aikya is perfect for places needing fast and accurate identification. It connects easily to both LAN and Wi-Fi, fitting well with different IT systems and organizational needs.
