Sachin Industries Limited (SIL) is a leading provider of filter presses, glass reactors & special alloys offering a broad portfolio of products, services, and expertise to support industrial customers.

Since 1982, SIL has been manufacturing, designing, and supplying filter presses, polypropylene filter plates, and P.P. Membrane Filter Plates in India. As a part of innovation & growth in 2011, the organization started developing a glass-lined equipment manufacturing plant "SILGLAS" that served as a global benchmark. The facility was built in technical collaboration with JP Laboratories, Inc., a US company with more than 80 patents globally. We take great pride in introducing ourselves as one of the largest, most qualified, and most experienced technocrat teams in the country.

SIL has also successfully commenced the manufacturing unit for "SILALOY". We specialize in process solutions in accordance with ASME/PED to design and manufacture equipment in stainless steel and special alloys. The wide range of alloy process equipment are reactors, columns, heat exchangers, evaporators and other pressure vessels.
