Learn from Experts Become a Professional

About Us

TechEntry is a learning platform built to create dynamic learners and enable successful career transitions. We noticed that the software industry is rapidly evolving with technological advancement. This means learners have to pace themselves with the skills necessary to match the industry's needs.

Why Choose Us?

Learn from Industry Experts

Our team mentors is made of industry professional with years of experience in software development.

Professional Network

Work on-site with our team, meet clients, and become a part of our professional network.

Career Guidance

Our team will help you, plan your career path and make a smooth transition at any point in your learning phase.

Placement Support

After the training program, we will help you associate with reputed businesses or even let you join our organization.

Join TechEntry

We help fresher's, as well as working professionals, find careers that best suit them and provide them with the skills to excel in their job. Our job-enabled courses will help you master programming languages, software, and web development skills. We prepare you with industry-relevant skills and connect you with clients to give you industry exposure.

On-Site Program

Get hands-on training and gain practical experience working with our team of professionals.

Flexible Fee Structure

Choose to pay upfront and start your training or pay post-placement for better affordability.

Hybrid Learning

We let you choose an entire on-site program or a combination of on-site and online training model.

Career Growth

We help working professionals progress in their career paths and help them reach their career goals with a skill upgrade.
