The School Of Embryology and Assisted Reproductive Technology (SEART), located in Gurgaon, is a leading institute offering comprehensive training in the field of reproductive medicine, specializing in clinical embryology and ART (Assisted Reproductive Technology). SEART's vision is to equip students and professionals with the knowledge and hands-on experience needed to excel in the rapidly growing field of embryology. With state-of-the-art technology and an expert team of faculty members, SEART provides a world-class educational environment for students.

Courses Offered by School Of Embryology and Assisted Reproductive Technology (SEART)

1. M.Sc. in Clinical Embryology

2. The M.Sc. in Clinical Embryology is a two-year postgraduate program designed for life science graduates. The course provides an in-depth understanding of embryology and reproductive medicine, with a focus on techniques such as IVF (In Vitro Fertilization), ICSI (Intracytoplasmic

Sperm Injection), and cryopreservation. Students will gain practical experience in labs and acquire the necessary skills for a successful career in clinical embryology.

### 3. Fellowship in Clinical Embryology

4. The fellowship program is ideal for medical professionals looking to gain advanced training in clinical embryology. Participants will receive hands-on training in sperm handling, embryo transfer, and culturing techniques, helping them refine their skills and expertise in the field of ART.

### 5. Advanced Certificate in Clinical ART

6. This course offers specialized training in ART procedures such as gamete handling, embryo freezing, and IVF. The program is designed for professionals who want to deepen their understanding of ART and gain practical experience in a laboratory setting.

### 7. Skill Enhancing Specialization in Clinical ART

8. The Skill Enhancing Specialization course focuses on the latest developments in ART, providing professionals with hands-on experience in advanced fertility procedures such as IVF and gamete manipulation. The course is ideal for those who want to stay current with evolving techniques in reproductive medicine.

### 9. Integrated B.Sc. + M.Sc. Program in Clinical Embryology

10. The Integrated B.Sc. + M.Sc. program is a five-year course that offers students a seamless transition from undergraduate to postgraduate education in clinical embryology. It covers both fundamental biological sciences and advanced ART techniques, providing students with a strong foundation for a long-term career in embryology.

### 11. Diploma in Clinical Embryology

12. The diploma course is a shorter program designed to provide essential training in clinical embryology. Participants will learn core techniques such as sperm handling, egg fertilization, and embryo transfer, preparing them for entry-level roles in the field of reproductive medicine.

### 13. Certificate Course in Advanced Clinical Embryology & ICSI

14. This certificate course is specifically designed for professionals who want to specialize in advanced clinical embryology, with a focus on ICSI (Intracytoplasmic Sperm Injection). Participants will receive practical training in IVF labs, enabling them to handle complex fertility cases with confidence.
