Trishla Foundation is a non-profit organization that serves children and adolescents with cerebral palsy. Our organization operates as a rehabilitation and treatment facility in India and other surrounding nations. For treating cerebral palsy, we have a consistent and MULTIMODAL strategy. We employ a variety of therapeutic modalities, including counseling, physiotherapy, occupational therapy, speech therapy, special education, hand therapy, and many more.

Children with cerebral palsy also get training on how to conduct everyday activities, sports, braces, and surgery, among other things.

Trishla Foundation was founded in 2014 by Dr. Jitendra Kumar. Dr. Jain works with a team of 40 experts to assist numerous children with cerebral palsy. We train not only children but also parents to support their children and offer them a brighter future. We aim to make cerebral palsy patients independent and happy.

The most pleasing aspect of training is that parents and children must stay in Prayagraj (Allahabad) for 3 to 6 months for training and other therapies to be effective in our treatment center. Furthermore, the costs of staying there and receiving treatment are minimal and cheap.

Many individuals contribute to the Trishla Foundation to support needy cerebral palsy patients. Trishla Foundation gives children with cerebral palsy a fresh lease on life. For many individuals, they are a ray of sunlight.
