Globe Valves manufacturer from IPC are ideally unidirectional. These can be utilized for isolation as well as for flow control. The flow characteristics of a Globe Valve are easy to control hence flow control can be achieved at any open position. This makes the design suitable for throttling application. Globe valves have superior strength and long cycle life. Pillar yoke construction provides easy access to bonnet & packing rings for maintenance. All valves are manufactured in accordance with the latest industry standards.

IPC is leading manufacturer of [Gate](#), [Globe](#) & [Check](#) valves. Integral Process Controls was founded in 2001 with and objective to solve two key pain points for the customers. First, was to reduce the valve delivery time, significantly, to meet the aggressive demand timelines of the clients. Secondly, we sensed a need to meet the huge and largely unmet need for assured supply of quality valve and valve automation solutions of the customers.
