**Farm Fresh Milk:** Our dairy experts carefully collect the milk from these happy cows, with a commitment to preserving its natural purity.

**Traditional Churning:** We adhere to time-honored methods of churning, turning this milk into thick curd, which is then hand-churned to perfection.

**Clarification:** The curd is gently heated to separate the golden liquid from the milk solids, meticulously clarifying it.

**The Gold Standard:** The final product is pure A2 Desi Cow Ghee, characterized by its distinctive golden fragrance, rich flavor, and unmistakable golden hue.
