Darren is one of many of our happy customers. He was looking for a reliable team of developers that compliments his team in the UK. And he found one in Acquaint Softech Private Limited. He got support from us even on weekends which was a major relief for him. The path to project completion wasn't easy and was laid with many potholes. As he mentions in the video, his website was hacked and we were there to help him get back on track immediately. This has led to years of partnership between us for multiple projects.

Think Partner, Not Agency

[Acquaint Softtech](#) is a global engineering partner helping agencies, SaaS founders, and enterprises scale their development capacity with vetted remote developers. We provide dedicated Laravel, MERN, MEAN, Python, WordPress, WooCommerce, Statamic, Bagisto, DevOps, Project Managers, and full cross-functional teams starting at competitive hourly rates.

As an Official Laravel Partner with a 70+ in-house engineering team, we deploy fully vetted developers within 48 hours. Our clients use us to extend their teams, build enterprise applications, modernize existing systems, or accelerate roadmap execution without the overhead of full-time hiring.

We focus on high-quality staff augmentation, dedicated teams, and long-term development partnerships. Every engagement follows an NDA-backed onboarding process, ISO-aligned workflows, transparent delivery, and continuous communication.

What clients get with us:

- 48-hour onboarding for remote developers
- Scale from 1 to 20+ engineers anytime
- 70+ in-house developers across 10+ stacks
- 12+ month average engagement
- Proven delivery across 200+ global projects

- Expertise in SaaS, eCommerce, API development, modernization, and AI-led solutions

Whether you're building a new product, strengthening an existing engineering team, or looking for reliable long-term development support, Acquaint Softech becomes your dedicated tech partner focused on predictable delivery and measurable outcomes.
